

IN THE SPECIFICATION

Please note Specification Page 14, and particularly the paragraph that begins at line 6 with "It is to be appreciated" and ends at line 22 with "scope of the present invention." Please replace this paragraph with the following paragraph:

--It is to be appreciated that while preferred embodiments of the present invention have been described herein with the alignment mark on the work piece being a box structure or box image, [[or]] other shapes may be employed with the goal being to frame the bright spot. Thus, for example, a shape similar to the letter C could also be used, as well as a triangle, a rectangle, a polygon, or any other that allows for orientation of the work piece with the bright spot. However, it is to be appreciated that [[the]] with increases in the complexity of the shape of the alignment mark come increases in the manufacturing of the mark which negate some of the gains that could be achieved with more simple alignment marks. Given the teachings of the present invention provided herein, one of ordinary skill in the related art will contemplate these and various other alignment marks on the work piece which maintain the spirit and scope of the present invention.--
